SUMMARY

Unity developer with a strong foundation in Computer Science and hands-on experience building interactive systems using C# and Unity. Skilled in gameplay programming, UI implementation, and performance optimization. Background in web development enhances the ability to create intuitive and user-friendly game interfaces. Passionate about developing engaging game experiences and solving technical challenges efficiently.

SKILLS

Game Development

Unity, C#

Programming

C#, PHP, JavaScript

Web

HTML, CSS

Database

SQL

Concepts

OOP, Data Structures,
Algorithms, UI/UX
Design

Tools

Git, GitHub

Other

Problem-Solving,
Debugging, Optimization,
Object Pooling, Event
Systems

PROJECTS

Scalar Shooter (3D), Unity (C#) - A project for GDTV 2026 Game Jam

Portfolio [↗](#) | GitHub [↗](#)

- Developed an endless runner FPS game in Unity using C# with procedural level generation.
- Integrated spline-based spaceship navigation with procedural chunk generation to maintain continuous gameplay flow.
- Designed checkpoint and progression mechanics to maintain pacing and gameplay flow.
- Built objective and scoring systems with dynamic reward handling.
- Created responsive FPS controls including movement, camera handling, and player interactions.

Top-down Roguelike Shooter Game (2D), Unity (C#)

Portfolio [↗](#) | GitHub [↗](#)

- Developed core gameplay systems, including player movement, shooting mechanics, and enemy AI
- Implemented bullet spread, fire rate control, and damage systems
- Applied object pooling to improve performance and reduce runtime instantiation
- Built UI elements such as health bars and in-game feedback systems
- Designed modular systems using event-driven architecture

Turn-Based Strategy Game (3D), Unity (C#)

Portfolio [↗](#) | GitHub [↗](#)

- Developed a grid-based system to manage unit positioning, movement, and interactions
- Implemented turn-based mechanics including action sequencing and unit control flow
- Built pathfinding logic to enable efficient navigation across the grid
- Designed multi-floor support, allowing units to traverse different vertical layers
- Structured scalable and modular systems using OOP principles and clean architecture

PROFESSIONAL EXPERIENCE

Mapping Specialist, TrueCommerce Vietnam (Dicentral)

2021 – 2025

Ho Chi Minh City,
Vietnam

- Designed and implemented data mappings to integrate client systems using EDI standards
- Translated business requirements into technical specifications for reliable data exchange
- Troubleshoot and resolved data transformation issues, ensuring accuracy and system stability
- Collaborated with cross-functional teams to support client onboarding and integrations
- Optimized data workflows, improving processing efficiency and reducing errors

Web developer, Vilink

2018 – 2020

Ho Chi Minh City,
Vietnam

- Developed and maintained web interfaces using HTML, CSS, and PHP
- Built responsive and user-friendly UI components, improving overall user experience
- Applied UI/UX principles to create intuitive and accessible interfaces
- Collaborated with team members to deliver clean and maintainable front-end code
- Leveraged web development experience to support UI design thinking for game development

EDUCATION

B.Sc. in Computer Science, International University

2013 – 2017

Ho Chi Minh City,
Vietnam

- Relevant coursework: Data Structures, Algorithms, Software Engineering, Web Development
- Final project: Medical Records Management with OAuth2

LANGUAGES

Vietnamese

English

INTERESTS

- Game development and building indie projects in Unity
- Exploring gameplay systems and mechanics in modern games
- Strong interest in strategy and turn-based games, focusing on decision-making and game balance

ADDITIONAL INFORMATION

- Strong interest in game system design and architecture
- Continuously learning and building Unity-based projects
- Comfortable working with both solo and team-based development
- Familiar with using AI tools to assist development, debugging, and learning new technologies
